Welcome to the first quarter FY 2005 Record of Decision System (RODS) CD set. RODS is the source for obtaining Record of Decision (ROD), ROD Amendment, and Explanation of Significant Differences (ESD) documents for Superfund sites.

RODS is contained on a two-CD set. CD #1 contains documents for EPA Regions 1–4 and CD #2 contains documents for EPA Regions 5–10. For details on the use of the two CDs, please see the "[How to View a ROD Document](#)" section of the RODS User Guide.

For your convenience, both CDs include the RODS User Guide. In addition to providing instructions for working across multiple CDs, the guide also contains navigation tips and instructions for using the full-text search tools. The guide also includes associated references for web hyperlinks to comprehensive site information on current and archived hazardous waste sites.
