Welcome to the first quarter FY 2002 Superfund Public Information System (SPIS) CD. This is the source for obtaining Record of Decision (ROD), ROD Amendment, and Explanation of Significant Difference (ESD) documents for Superfund sites stored in the Record of Decision System (RODS). EPA is dedicated to providing the public with accurate, timely information about Superfund sites.

For your convenience, this CD includes the *SPIS User Guide*, which contains installation instructions, navigation tips, and instructions for using the full-text search tool. This guide also includes associated references for and Web hyperlinks to comprehensive site information on current and archived hazardous waste sites.
