

Help browsing HTML files from the CD-ROM

When you select the link from the Welcome.pdf file to view "Tax Products in HTML" from the CD-ROM's main menu, a separate internet browser session will open. Within this session, you will find and view information (html files) on the CD-ROM using your normal browser functionality.

In some cases, you may be prompted with a warning dialog box concerning opening files that contain programs, macros, or viruses that could potentially harm your computer. The dialog box may advise you to OPEN the files only if they were placed by a trusted source. In order to view the HTML files on the CD-ROM, the user must select OK or OPEN.

To leave the HTML files and return to the main menu (welcome.pdf file), the user will close the browser session and return to the Acrobat session.

If you do not have an internet browser loaded, an error message will display.

Internet browsers are freely available on the world wide web.
